

Good Morning:

Thank you for your interest in our business graphics software.
We've enclosed a brochure describing:

CHART-MASTER for creating sophisticated charts and
graphs quickly and easily, &
SIGN-MASTER for producing presentation text — headlines,
title pages, tables, outlines, etc.

We've also enclosed a Hardware Requirements sheet which lists the many plotters and
printers currently supported, a recent article from List magazine, and some sample charts.
These samples were printed from actual CHART-MASTER charts
(you can make charts of any size and place up to 9 on a page).

IF

- ... you need to explain, convince, cajole, or dazzle
- ... you want flexibility and control over your presentations
- ... you have *no* time to learn another software package
- ... you can't afford to sacrifice quality

CALL US

— We'll recommend a dealer near you, answer any questions,
arrange a demonstration, or discuss your graphics needs with you.

“CHART-MASTER replaces computerese with *computerease*.” BYTE

“... is quick, does its job well and offers a lot of features.” SOFTALK

“... comes closest to the ideal of a business graphics software package.” LIST
